### Plus, purchase any set of mufflers or exhaust from us with your Big-Bore and...

- \* We will assemble and install it for you at no additional charge during your Big-Bore installation
- \* You will receive a free Mountain Creek Harley-Davidson T-shirt of your choice

**FREE**

Unlike other performance kits our prices include all the necessary gaskets and labor for installation. Separate purchase and installation of high-performance air cleaner kit is required if not already installed on vehicle. Separate purchase of any high-performance mufflers or exhaust for all kits is highly recommended for best performance. All EFI-equipped models require ECM calibration or tuning. Screamin' Eagle Pro Super Tuner is recommended for best results. Note that installation of automatic compression releases on large displacement engines is highly recommended.
